about me

On the hunt for a web dev internship where I can flex my skills in both front-end and back-end. Currently wrapping up training at AFPA, I need an internship stint from October 14th to December 20th. I have a background in graphic design but now I'm all about that programming life. Let's team up and create something awesome together!

skills

HTML/CSS
JS/TS/Angular
MySQL
PHP/Laravel
Adobe
Photography
